Albertinen-Hospital

Stand Z2K34

The Albertinen is the largest diaconical and a well-renowned hospital in Hamburg. Our 60.000 inpatients and outpatients per year receive individual treatment in Cardiac care, Vascular and Endovascular Surgery, Orthopedics, Gynecology, Obstetrics, Oncology, Neurology, Urology, Surgery and Internal medicine. The journey through our departments can be completed in an ambulatory check-up.

The Albertinen Cardiovascular Center is one of Germany's leading centers of Heart Medicine! The complete arterial revascularization with and without the use of cardiopulmonary bypass, mitral, tricuspid and aortic valve reconstruction as well as aortic aneurysm surgery with reconstruction of failing aortic valves are now part of daily routine. With the three new departments "Per-cutaneous Treatment of Valvular Heart Disease", "Heart Failure and Device Therapy" and "Electrophysiology" we have expanded our range of services with pioneering treatment methods and strive to find together the optimal therapy for our patients.

The Albertinen International Patient Service (AIPS) acts as an interdepartmental coordinating post for the treatment of foreign patients in our highly specialized departments.

Our goal is to help people by providing first class medicine, professional care and personal attention.

Asklepios Kliniken Hamburg GmbH

Stand Z2K34

Asklepios Kliniken

Asklepios is one of the largest operators of private clinics and healthcare facilities in Germany. Founded more than 30 years ago, the clinic group follows a responsible and sustainable strategy geared towards a high level of safety and quality. The group currently has more than 150 healthcare facilities spread across Germany between the Island of Sylt on the North Sea and Lindau by Lake Constance and employs more than 45,000 employees.

Medical quality management at the highest level is an area in which Asklepios particular excels. The clinic operators benefit from the group's structure; by promoting the transfer of knowledge between the houses, the group is able to maintain exceptionally high standards of treatment. The results are also published regularly. The Medical Results Report appears annually and 25 criteria on patient safety are regularly published on the Internet at www.Qualitätskliniken.de. Asklepios is one of its founding members.

The Asklepios Kliniken in Hamburg

Hamburg is one of the regions with the best inpatient medical care in Germany. Such a level of care is outstanding and roughly half of these treatments can be ascribed to the Asklepios Kliniken. The Asklepios Kliniken in Hamburg are Europe's largest cluster of clinics at one location, covering almost every medical discipline and ranging from ophthalmology to dentistry. More than 2,000 doctors are among the 14,000 employees.

Deutsches Elektronen-Synchrotron DESY

Stand Z2K34

Research for your projects

Deutsches Elektronen-Synchrotron DESY is one of the world's leading particle accelerator centers, located in Hamburg, Germany and offers industrial companies access to a unique combination of analytical and research facilities. Researchers use the lightsources at DESY to explore the microcosm in all its variety – ranging from the interaction of tiny elementary particles to the behavior of innovative nanomaterials and biomolecules.

With the help of one of the most brilliant synchrotrons, PETRA III, it is possible to streamline research and development for drugs. Fast, precisely and reliably. This includes for example:

- Running experiments and performing the analysis, that offer important results for the development of new drugs, which act exactly and to the point where the virus attacks;
- Scientific findings and conclusions in a wide field of applications, which benefit pharmaceutical, bio-tech and life science companies.

Some of the benefits of working with DESY for research and development projects are:

- Fast and direct access to big research units, state-of-the-art laboratories, high-precision workshops and experts – scientists, engineers and technicians
- Feasibility study at no charge
- Professional and scientific consulting and support during experiments and data analysis.

Fraunhofer Group for Life Sciences

Stand Z2K37

Applied Science Dedicated to Life

Six Fraunhofer institutes and a Fraunhofer research institution have focused their research on the life sciences. In the Fraunhofer Group for Life Sciences they have pooled their competencies in biology, chemistry, biochemistry, biotechnology, medicine, pharmacology, ecology, and nutritional science. With a staff of over 1700, the Fraunhofer Group for Life Sciences is an important R&D partner for the pharmaceutical and biotechnology sectors as well as for the chemicals industry, medical technology companies, and food industry.

What characterizes the research performed in the Fraunhofer Group for Life Sciences is its closeness to industrial application, always with a view to economic efficiency and sustainability. Our business units include translational medicine research and biomedical technology, regenerative medicine, healthy food-stuffs, industrial biotechnology, and research aimed at the safety of processes, chemicals, and pesticides.

Preventive and regenerative approaches, individual and general considerations, all aspects are finally subsumed under the motto “research for human health and the environment”, under which the Group offers its research services.

Fraunhofer EMB

Stand Z2K37

The Fraunhofer Research Institution for Marine Biotechnology and Cell Technology performs industrial research in the field of life sciences. A multidisciplinary team of biologists, physicians, engineers and technicians develops technologies, procedures and devices for cell isolation, cell handling and analysis. These innovative technologies are applied e.g. in diagnostics and prevention, medicine and cosmetics.

Together with our partner cellbox solutions GmbH we have developed a unique technology for the transportation of cell cultures and other cell based samples and biomaterials. The product cellbox is a self-sufficient incubator with an adjustable temperature and gas environment, ensuring the correct storage and maintaining of living cells and tissues. We are successfully reducing the risk of harming cell specimens and therefore keeping the high quality standard of your products. Additionally, data is continuously documented providing constant examination and observation. That means no time loss due to freezing, thawing and regenerating samples; no loss of cells and changes in their physiology or structural integrity due to missing CO₂ buffers or other insufficient conditions.

- Active precision heating and cooling
- Precisely controlled gas atmosphere
- Rechargeable battery with integrated 100 -230V power supply
- Ambient Temperature range -20° C to 50° C
- Temperature holding duration 12+ hours to 96+ hours
- Shock proofed and stable
- Easy to handle
- Data logging provides constant detailed information

TUR Therapietechnik GmbH

Stand Z2K39

TUR combines its long history with modern engineering to deliver complete solutions for physiotherapy, rehabilitation, medical aesthetics and sport medicine. The presence in more than 40 countries worldwide proves the acceptance of TUR's technologies and the recognition of our excellence in quality. The highlights of our range are:

Shockwave | kimatur... is one of the latest and unique entries in the physical medicine field, offering a diverse range of application for many pathologies.

Isokinetic | isoforce... the multi-joint technology for assessment, training and rehabilitation has been used for many years in the field of sport medicine and is found at smaller and larger rehabilitation structures.

Shortwave Therapy | Thermatur 200+... presents the next generation of the popular TUR diathermy series and is enhanced with automatic tuning, suitable for continuous and pulsed therapy.

Cryotherapy | Cryotur STREAM... offers advanced therapeutic capabilities with an -32°C cold air stream and temperature feedback.
